

Get X509 key manager from .p12 file

Get X509 key manager from .p12 file

```
private KeyManager[] getKeyManagers() throws IOException, GeneralSecurityException {
    Logger.getLogger(PKITest.class.getName()).log(Level.SEVERE, "Step 1");
    //Init a key store with the given file.

    String alg = KeyManagerFactory.getDefaultAlgorithm();
    KeyManagerFactory kmFact = KeyManagerFactory.getInstance(alg);

    FileInputStream fis = new FileInputStream("/Users/marc/Downloads/070A71.p12");
    KeyStore ks = KeyStore.getInstance("pkcs12");
    ks.load(fis, "password".toCharArray());
    fis.close();

    //Init the key manager factory with the loaded key store
    kmFact.init(ks, "password".toCharArray());

    KeyManager[] kms = kmFact.getKeyManagers();
    return kms;
}
```
